咬胶模注机
Pet chews mahine

主要特点 Main Features

狗咬胶是经多种物料科学配比，由螺杆挤出机挤压成型制成棒状、骨状等不同形状的咬胶型宠物食品。它既可提供犬类动物一些必须的应用，如：蛋白质、脂肪、维生素等，又给爱犬磨牙，满足犬类爱咀嚼的嗜好，同时还可强壮齿龈和颌骨，清洁口腔，清除牙垢，降低疾病传染，经常咀嚼并定期刷牙可以减慢齿菌斑和牙垢的形成，能减少牙龈炎及其它污垢的形成。在小狗长牙阶段牙床很痒，既减轻痛苦，又保护家中的物品不被损坏。

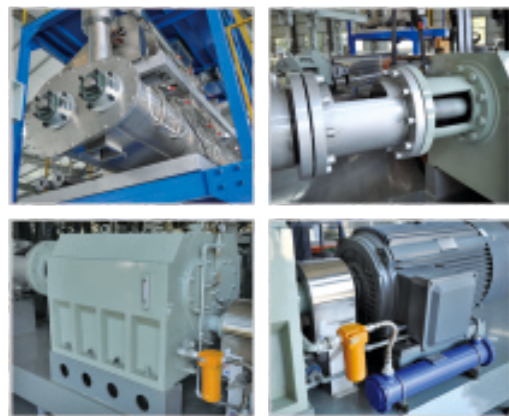

Pet chews takes starch as raw materials with scientific configuration and was extruded from co-extruder, It can be made into different kind of shapes such as stick, bone, bi-color, bi-flavor, etc. This kind of food not only provide protein, fat, vitamin, nutrition for dogs, but also satisfy the dog nature hobby. It has following features: strong teeth, clean mouth and teeth. The products can be in many shapes, like twist, double colors, core-filling and so on.

主要特点 Main Features

带式环流干燥机是一种卧式干燥机，以蒸汽、天然气加热的空气为干燥介质，采用穿流（空气流动方向与物料前进方向呈“十”字交叉状）干燥方法，使物料与热空气在干燥机内实现湿热交换，藉以去除物料中的多余水分，不仅使之达到成品所需的水分要求，还可以满足低温烘培的效果，更好的锁住物料的营养成分。

The belt circulation dryer is horizontal style, which uses the steam or gas to heat air as the drying medium and adopts the flow-through drying method (the direction of air flow and the direction of material are in a cross shape) to remove the excess water in the material. It not only ensures that the moisture content of the finished product meets the standard requirement, but also meets the effect of low temperature baking, so as to lock the nutrient content of the material.
